Markus Legner: "Architektur und Arbeitsweise eines Web-Browsers, Hauptseminar Datenbank-und Informationssysteme WS 2000", January 14, 2001

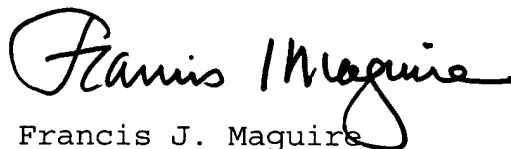

This document represents a university term paper which is available on the internet. It describes the basic architecture and functionality of a state-of-the art web browser. In chapter 2, the logical architecture of a browser, browser concepts such as the "Java Virtual Machine", Cookies and Cache, and the standard process of generating pages are introduced. Figure 1 on page 3 of this chapter served as a basis for Figs. 6 and 7 in the patent application draft, wherein in Fig. 6 of the draft, the "image map controller/interpreter" unit 15 and in Fig. 7 of the draft, the "optimization server" 17 was added. Chapters 3 and 4 concentrate on the specific features of the Mozilla/Netscape Navigator and Microsoft Internet Explorer browsers.

"Chapter 4: Hyperlinks - interne und externe Quellverweise", from Johann-Christian Hanke: "Websites professionell selbst gestalten", Franzis' Verlag GmbH, Pöcking, 2003

This documents represents the fourth chapter of a text book on the generation of HTML pages. The basic concepts of hyperlinks are explained, such as for instance text links, image links, music and multimedia links, e-mail links, FTP-links. On page 109, as short introduction into image maps

and a short briefing on how to generate image maps with the tool "MapMaker" is given.

Respectfully submitted,

A handwritten signature in black ink that reads "Francis J. Maguire". The signature is written in a cursive style with a large, looping initial 'F'.

Francis J. Maguire
